

# Geotechnical Engineer

ASX listed **Apex Minerals NL** (ASX Code: AXM) commenced re-developing the Wiluna Operation during the second half of 2008.

The Wiluna Operation is the centre point of Apex's regional consolidation strategy in Western Australia's North Eastern Goldfields due to its extensive resources and existing gold treatment plant, mine and infrastructure. The gold treatment plant is capable of treating 1Mtpa of free milling and refractory ores (using the BIOX process) and will be the central treatment facility for ore proposed to be mined from the Wilson's and Youanmi projects.

Apex has commenced production and is undertaking mining activities as owner operator.

## **The Role**

An opportunity has become available for an experienced Geotechnical Engineer to join the mining team based at the Wiluna Gold Mine.

## **Core responsibilities for this role will include;**

- Maintain and monitor the Ground Control Management Plan and Seismic Risk Management Plan and systems;
- Monitor and make recommendations in relation to ground support systems and applications;
- Facilitate training, in relation to ground support system and the surface support system
- Make geotechnical recommendations in relation to mine plans and sequence; and
- Maintain and update the geotechnical model.

**To be considered for this role you will be tertiary qualified with significant Geotechnical Engineering experience (including experience within an underground mining environment).**

A competitive remuneration will be negotiated with the successful applicant. This is a FIFO role, with flight available from Perth or Kalgoorlie.

To be considered for this role, please forward your CV and covering letter in confidence to [recruit@apexminerals.com.au](mailto:recruit@apexminerals.com.au)
