

Mine Planning Engineer (Long Term Planning) – Gold

ASX listed **Apex Minerals NL** (ASX Code: AXM) commenced re-developing the Wiluna Operation during the second half of 2008.

The Wiluna Operation is the centre point of Apex's regional consolidation strategy in Western Australia's North Eastern Goldfields due to its extensive resources and existing gold treatment plant, mine and infrastructure. The gold treatment plant is capable of treating 1Mtpa of free milling and refractory ores (using the BIOX process) and will be the central treatment facility for ore proposed to be mined from the Wilson's and Youanmi projects.

Apex has commenced production and is undertaking mining activities as owner operator.

The Role

Applications are sought for the newly created role of **Long Term Mine Planning Engineer** to join the mining team at the Wiluna Gold Operation.

Reporting directly to the Mining Manager, you will be responsible for:

- Coordinating all medium and long-term mine planning and associated activities
- Evaluate economics for all new proposed mining projects
- Maintain Ore Reserves
- Maintain Life of Mine schedule
- Developing and implementing mine planning systems

To be considered for this role you will be tertiary qualified with significant mine planning experience (including experience within an underground mining environment).

This is a FIFO ex Perth or Kalgoorlie and offers excellent camp/accommodation facilities.

To be considered for this role please forward your CV and a covering letter in confidence to recruit@apexminerals.com.au

Please provide "your name and the position that you are applying for" in the subject areas of your email.
