

GRADUATE GEOLOGIST / MINE GEOLOGIST

ASX listed Apex Minerals NL (ASX Code: AXM) commenced re-developing the Wiluna Operation during the second half of 2008.

The Wiluna Operation is the centre point of Apex's regional consolidation strategy in Western Australia's North Eastern Goldfields due to its extensive resources and existing gold treatment plant, mine and infrastructure. The gold treatment plant is capable of treating 1Mtpa of free milling and refractory ores (using the BIOX process) and will be the central treatment facility for ore proposed to be mined from the Wilson's and Youanmi projects.

Apex has commenced production and is undertaking mining activities as owner operator.

Apex is seeking a high calibre **Graduate Geologist / Mine Geologist** to join the Mining & Geology Team at Wiluna. In this role you will support the Geologists across a range of production and development functions in an underground mining environment.

Applications are sought from applicants who have the following Qualifications, commitment and personal attributes.

- BSc in Geology (Honours will be highly regarded).
- A commitment to safety and environment
- Energy, enthusiasm and a willingness to get involved in a broad range of functions.
- A team player with good communication and writing skills.
- An ambition to build a long term career in Geology.
- Computing skills, include Windows, spreadsheets, geological packages etc.

The is a site based role operating on an (8:6) FIFO ex Perth. A competitive remuneration package and additional benefits including employee option plan will be negotiated with the successful candidate.

To be considered for this role, please provide a letter and CV in confidence to recruit@apexminerals.com.au
